

Mr. Leung Wai Chung

dev-chungl@proton.me

Overview

Computer Science student with experience in full-stack development, IT support, and QA Testing. Proficient in Java, Python, and JavaScript (Node.js), with demonstrated ability in database systems, system integration testing, and cross-platform application design. Seeking opportunity to contribute to production systems and solve real-world problems in a collaborative development team.

Education

Bachelor in Computer Science, Hong Kong Metropolitan University
Sep 2024 – June 2026 (Expected)

Associate in Information Technology, Hong Kong Community College
Sep 2022 – June 2024

Certifications / Awards

Certificate for Participation, HKMU Hackathon 2025

- Proposed gamified companion app to increase elderly smartwatch adoption through referral rewards system; presented cross-platform solution (iOS/Android) supporting smart watches like Apple Watch and Galaxy Watch to GE Healthcare Hong Kong CEO.

Jan 2025

Certificate of participation, Hong Kong Cyber Security New Generation Capture the Flag Challenge 2022

Dec 2022

Work Experiences

Part-time Teaching Assistant, Infocan Computer (Hong Kong) Limited

Sep 2025 – Present

- Proctored computer-based examinations and enforced testing standards.
- Instructed participants on software applications and technical procedures.
- Assisted with examination computers hardware and software setup in test centers.

Student Intern (Programmer), Global Technology Integrator Limited

July 2025 – Aug 2025

- Performed System Integration Testing (SIT) to validate end-to-end functionality across modules.
- Designed and executed comprehensive test cases based on functional requirements and user scenarios.
- Documented bugs and test results using internal tools, contributing to QA and development cycles.
- Collected and recorded user requests and issues identified during UAT.
- Executed 20+ test cases and identified 2 critical bugs in SIT stages.
- Assisted in recording and editing user guide videos of the system in English, Traditional Chinese and Simplified Chinese.

Other Experiences / Projects

Final Year Group Project

AI-Assisted Requirements Gathering Platform, Software Architect & Backend Developer
Sep 2025 – Apr 2026 (Expected)

Lead backend architecture decisions for 4 person team. Responsible for backend API, database schema creation, Grok AI API Integration, prompt engineering and production deployment with Linode VPS and custom NameCheap domain. Coordinate with front-end developers and AI engineers with issues and pull requests from their branches. Engineered prompt to enable requirement gathering automation and report generation.

- Technology Stack: Node.js, Express, SQLite, MinIO, EJS, HTML, CSS
- APIs & Authentication: Grok AI (XAI), Google OAuth, SimpleWebAuthn
- Infrastructure: Linode (VPS), NameCheap (Domain)
- Tools: Git/GitHub, WebStorm

Cross Platform Desktop Application

Media Metadata & LUFs Checker - Python

Developed a cross-platform desktop application using PyQt5 for media metadata and LUFs level verification, enhancing user experience with drag-and-drop functionality.

- Technology Stack: PyQt5, ffmpeg (ffprobe)
- IDE: PyCharm

Web Application

Vibe & Notable – Node.js Web Applications (Self-hostable)

Developed two full-stack Node.js web apps: Vibe, a real-time voting platform, and Notable, a note-taking app. Implemented Google OAuth for user authentication, secure session handling with Cookie-Session, and dynamic theming using the Unsplash API.

- Technology Stack: JavaScript, HTML, CSS, EJS, Node.js, Express, MongoDB, Mongoose, jQuery, Bootstrap 5
- Authentication & APIs: Google OAuth, Cookie-Session, Unsplash API
- Tools: Git/GitHub, WebStorm

Technical skills

Proficient

JavaScript (Node.js), HTML, CSS, jQuery, NPM, Linux CLI, Git/GitHub

Experienced

Python, Java, MySQL, MongoDB, SQLite, Android (Java)

Familiar

Nginx, React.js, PyQt5, JSwing, Linode, Firebase, Docker

Languages

Cantonese (Native) / Putonghua / Guo Yu / English
