Leung Wai Chung

dev-chungl@proton.me | github.com/Chung1045

EDUCATION

Bachelor of Science with Honours in Computer Science, Hong Kong Metropolitan University Sep 2024 – Aug 2026

Relevant coursework: Database Systems & Data Mining, Object-Oriented Programming (OOP), Web & Mobile Application Development, Artificial Intelligence & Deep Learning, Cybersecurity, Software Engineering (SDLC), Cloud Computing

WORK EXPERIENCE

Infocan Computer (Hong Kong) Limited Sep 2025 – Present

Part-time Teaching Assistant

- Managed hardware deployments and software configurations for high-stakes examinations, ensuring zero downtime.
- Configured multimedia recording setups and delivered technical guidance to on-site coordinators.

Global Technology Integrator Limited July 2025 – Aug 2025

Student Intern (Programmer)

- Performed System Integration Testing (SIT) and executed 20+ test cases, identifying 2 critical bugs.
- Documented test results and tracked user requirements using internal tools to support QA and development cycles.
- Recorded and edited bilingual user guide videos (English, Traditional / Simplified Chinese)

OTHER EXPERIENCES / PROJECTS

Singularity, AI-Assisted Requirements Gathering Platform, Final Year Project (Node.js, React.js, MinIO)

Software Architect & Backend Developer

Multimodal LLM tool to automate software requirements gathering and documentation.

- Engineered RESTful API endpoints and optimized SQLite database schema using Node.js to process asynchronous file uploads and multimodal LLM payloads.
- Deployed the MVP to production on Linode VPS with MinIO file storage and custom domain configuration with Nginx.
- Implemented passwordless passkey authentication (SimpleWebAuthn) to mitigate credential vulnerabilities.
- Engineered AI prompts for automated requirements gathering and coordinated GitHub workflow (PR reviews, issue tracking).

Online Learning Environment Platform (Jakarta EE, Spring Boot, Hibernate)

- Developed a robust backend portal utilizing Spring Boot and MVC architecture to streamline course administration and student engagement.
- Prototyped and built responsive web UIs using Bootstrap/HTML, integrated with a Spring Boot MVC backend for live polling.
- Integrated Spring Data JPA with a MySQL database for persistent storage, utilizing H2 solely for automated unit testing.
- Designed and documented REST API endpoints to handle dynamic data exchanges between the frontend and Java backend.

UniteRide (Android-Java)

Real-time transport tracking app leveraging Government Open Data APIs.

- Integrated external transport data feeds using JSoup to parse API requests and deliver synchronized estimated time of arrival (ETA) data.
- Engineered a centralized dashboard merging multi-agency transit feeds and official traffic updates into a single application.

LEADERSHIP AND OTHER ENRICHMENTS

HKMU Hackathon 2025 – Aging Society Jan 2025

- Conceived and designed a Figma UI prototype for a gamified companion app aimed at increasing elderly smartwatch adoption through a referral rewards system.
- Architected a cross-platform solution concept supporting iOS and Android ecosystems (Apple Watch, Galaxy Watch) and successfully pitched the project directly to the GE Healthcare Hong Kong CEO.

Hong Kong Cyber Security New Generation Capture the Flag Challenge (2022) Dec 2022

SKILLS

Languages	Java (J2EE / Jakarta EE), Kotlin, Python, JavaScript, CSS
Frameworks	Spring Boot, Hibernate, Node.js, REST APIs, MVC Architecture, Jetpack Compose, Bootstrap, React.js, jQuery
Databases & Storage	MySQL, SQLite, MongoDB, H2 Database, MinIO
Tools & DevOps	Figma, Hoppscotch, Git/GitHub, GitHub Actions, Linux / Unix (CLI / Bash), Nginx, Docker, Microsoft 365
Technical Skills	System Prototyping and Planning, Web design, Technical Reporting
Languages (Spoken)	Cantonese (Native), Putonghua (Fluent), English (Fluent)
